

## Data Collection and Preprocessing Phase

Date	09 July 2024
Team ID	SWTID1720023141
Project Title	Prediction and Analysis of Liver Patient Data Using Machine Learning
Maximum Marks	2 Marks

### Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

#### Data Collection Plan Template

Section	Description
Project Overview	This project aims to enhance liver disease diagnosis and treatment by leveraging machine learning techniques to analyze patient data, providing accurate predictions and personalized treatment plans to improve healthcare outcomes.
Data Collection Plan	<ul style="list-style-type: none"> <li>- Collect data from patient records in collaboration with healthcare institutions.</li> <li>- Prioritize datasets with diverse demographic information.</li> <li>- Include data from clinical trials and liver disease research studies.</li> </ul>
Raw Data Sources Identified	The raw data sources for this project include datasets obtained from Kaggle and UCI, popular platforms for data science competitions and repositories. The provided Indian liver patient data represents a subset of the collected information, encompassing variables such as

	Age, Gender, Total_Bilirubin, Direct_Bilirubin, Alkaline_Phosphatase, Alamine_Aminotransferase, Aspartate_Aminotransferase, Total_Proteins, Albumin, Albumin_and_Globulin_Ratio, and additional datasets.
